Students and lifelong learners, do you struggle to discover open access resources?

Librarians and repository managers, are your users in need of getting suggestions of similar content to their searches?

Text miners, do you have any analytical questions that require large scientific dataset?

CORE, the world's largest aggregator of open access papers, has a solution to your needs via its services:

Content Discovery

- **CORE Recommender**: The recommender is a plugin for repositories, journal systems and web interfaces to suggest similar articles. Its purpose is to support users in discovering articles of interest from across the network of open access repositories.

- **CORE Discovery**: CORE Discovery is our new service, available both as a browser extension and a repository plugin, that assists users in finding freely accessible copies of research papers that are often behind a paywall. It currently provides access to millions of full text open access papers from within CORE and other data providers.

Managing Content

- **CORE Repository Dashboard**: The Repository Dashboard is a free service for our data providers. It provides an online interface offering valuable technical information and statistics to content providers. It is the tool you need to check that your repository is configured correctly to provide maximum visibility to your research outputs.

Access to Raw Data

- **CORE API**: A unique and free API providing real-time machine access to metadata and full texts of research papers in CORE. One API for accessing data across all data providers. Perfect for developing and running innovative applications that need global access to research papers.

- **CORE Dataset**: Download all of CORE data and run processes in your own infrastructure. One data set with a harmonised format for accessing data across all of our data providers. Perfect for prototyping new methods, data analysis and text mining.

- **CORE FastSync**: Keep an always up to date copy of all CORE data in your infrastructure. FastSync is our premium service offering fast enterprise incremental access to CORE for both commercial and non-commercial purposes. Ideal for all types of businesses, from start-ups to large enterprises.

With its analytical tools, CORE aims to contribute to the cultural change and promotion of open access, supporting a variety of stakeholders, such as researchers, libraries, software developers, funders and more.
